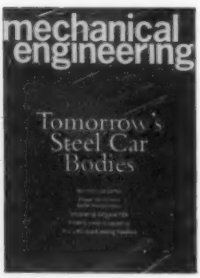
Mechanical Engineering: Index of 1997 articles

January



February

Feature Articles by Author

Allison, John L.
"Using CFD to Design Water-Jet Inlets," May, pages 82–83.

Allison, Stephen W., et al.
"Taking an Engine's Temperature," January, pages 72–74.

Alvfors, Per, et al.
"A Future for Biomass," October, pages 94–96.

Ashley, Steven
"Carbon Composites Fly High," September, pages 66–69.
"Diesel Cars Come Clean," August, pages 52–56.
"From CAD Art to Rapid Metal Tools," March, pages 82–87.
"Getting a Hold on Mechatronics," May, pages 60–63.
"Intelligent Sheet-Metal Bending," January, pages 62–64.
"Keys to Chrysler's Comeback," November, pages 88–90.
"Manufacturing Firms Face the Future," June, pages 70–74.
"Plastic Cars for Developing Nations," November, pages 76–78.
"Rapid-Response Design," December, pages 72–74.
"Roving Other Worlds by Remote," July, pages 74–76.
"Steel Cars Face a Weighty Decision," February, pages 56–61.
"Stripping Aircraft Paint with Starch," April, pages 58–62.
"Turbines on a Dime," October, pages 78–81.

Baumgartner, Henry
"Tinius Olsen and His Little Giant," February, pages 80–81.

Bejan, Adrian
"How Nature Takes Shape," October, pages 90–92.

Beshears, David L., et al.
"Taking an Engine's Temperature," January, pages 72–74.

Cates, Michael R., et al.
"Taking an Engine's Temperature," January, pages 72–74.

Cipra, Raymond J., and Matthew Gagliardi
"A Flexible Clutch Assembly Line," June, pages 86–89.

Conway, Thomas G.
"Improved Remote Heat Sensing," May, pages 88–89.

Copley, Brian P., and Kenneth L. Saunders

Cates, Michael R., et al.
"Taking an Engine's Temperature," January, pages 72–74.

Cipra, Raymond J., and Matthew Gagliardi
"A Flexible Clutch Assembly Line," June, pages 86–89.

Conway, Thomas G.
"Improved Remote Heat Sensing," May, pages 88–89.

Copley, Brian P., and Kenneth L. Saunders

"Failure Analysis of a Burner Shield," March, pages 114–116.

Deitz, Dan

"Automated Pressure-Vessel Design," November, pages 92–94.
"The Convergence of Design and Analysis," March, pages 93–100.
"Customer-Driven Simulation Software," May, pages 70–73.
"Engineering on the Biomedical Frontier," July, pages 72–73.
"FEA for the Real World," May, pages 78–80.
"FEA Helps Keep Space Shuttle Flying," April, pages 64–65.
"One-Stop Design and Analysis," February, pages 62–65.
"Optimizing Orthotic Designs with FEA," July, pages 70–71.
"Product Development on the Web," January, pages 66–69.
"Re-engineering Virtual Prototypes," September, pages 76–78.
"Visualizing Systems in Motion," December, pages 76–77.

Drake, Bill

"Analyzing Tolerance Limits," June, page 96.

Eidensten, Lars, et al.

"A Future for Biomass," October, pages 94–96.

Erdman, Arthur G., and Sridhar Kota

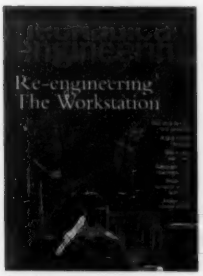
"Motion Control in Product Design," August, pages 74–77.

Gagliardi, Matthew, and Raymond J. Cipra

"A Flexible Clutch Assembly Line," June, pages 86–89.

Hamstra, Jeffrey W., and Daniel N. Miller

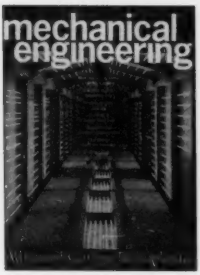
"Enlisting CFD to Fight Hammer Shock in Jets," March, pages 108–112.



March

April

May



June

Herman, David

"Millennial Mayhem for Manufacturing," September, pages 62–65.

Herold, K. E., and K. R. Kolos

"Bubbles Aboard the Shuttle," October, pages 98–100.

Jenkins, Michael G.

"Testing Ceramics for Creep," February, pages 72–76.

Koenig, Daniel T.

"Introducing New Products," August, pages 70–72.

Kolos, K. R., and K. E. Herold

"Bubbles Aboard the Shuttle," October, pages 98–100.

Kota, Sridhar, and Arthur G. Erdman

"Motion Control in Product Design," August, pages 74–77.

Koullen, Jo, and Franklin van den Hout

"A Tiny Turbojet for Model Aircraft," August, pages 66–69.

Li, Huachao, et al.

"Compacting Coal into Logs," November, pages 84–86.

Lin, Yuyi, et al.

"Compacting Coal into Logs," November, pages 84–86.

Marra, John

"An Expert System Eases Rotor Design," April, pages 70–72.

Martin, John

"Customized Design of Biomedical Parts," July, pages 68–69.
"Part Design Comes Together on the Net," June, pages 76–78.

July

August

Meher-Homji, Cyrus B.

"Anselm Franz and the Jumo 004," September, pages 88–91.

Midturi, Swaminadham

"Limiting Vibration in Space Lattices," December, pages 88–89.

Miller, Daniel N., and Jeffrey W. Hamstra

"Enlisting CFD to Fight Hammer Shock in Jets," March, pages 108–112.

Miller, David P., et al.

"Using Stream Surfaces for Blade Design," April, pages 66–68.

Miller, Perry L., IV, et al.

"Using Stream Surfaces for Blade Design," April, pages 66–68.

Nims, Robert

"Armor-Plated Auxiliary Power," August, pages 78–82.

Noel, Bruce W., et al.

"Taking an Engine's Temperature," January, pages 72–74.

Oliver, James H., et al.

"Using Stream Surfaces for Blade Design," April, pages 66–68.

Ortega, Hector V.

"Predicting Cerebral Aneurysms with CFD," January, pages 76–77.

Paula, Greg

"Automating Lens Manufacturing," March, pages 88–91.

"Better Intrinsically Safe than Sorry," June, pages 94–95.

"Building a Better Fieldbus," June, pages 90–92.

"Cobots for the Assembly Line," October, pages 82–84.

"Electronic Devices Boost Reliability," February, pages 78–79.

"An Explosion in Microsystems Technology," September, pages 71–74.

"Java Catches On for Manufacturing," December, pages 80–82.

"Keeping Ice Off Airplane Wings," May, pages 74–76.

"Modified Motor Designs Save Energy," January, pages 70–71.

"New Processors Transform Motion Control," April, pages 79–80.

"Reinventing a Core Product Line," October, pages 102–103.

"Rockwell's Proactive Re-engineering," June, pages 82–84.

"Sensors Give Chip Makers a New Edge," July, pages 88–91.

"Sensors Help Make Air Bags Safer," August, pages 62–65.

"Simulator Trains Chunnel Operators," January, pages 78–79.

Reinhart, Eugene R.

"Keeping Power Plants Profitable," April, pages 74–77.

"Managing Turbine-Generator Outages by Computer," September, pages 84–87.

Richerson, David W.

"Ceramics for Turbine Engines," September, pages 80–83.

Riotto, Jamie

"Re-engineering the Workstation," March, pages 76–80.

Rister, Bradley J., et al.

"A More Flexible Robotic Wrist," July, pages 78–80.

Saunders, Kenneth L., and Brian P. Copley

"Failure Analysis of a Burner Shield," March, pages 114–116.

Schmiedeler, James P., et al.

"A More Flexible Robotic Wrist," July, pages 78–80.

Sciubba, Enrico

"Calculating Entropy with CFD," October, pages 86–88.

Shemwell, Bert

"Simulating a Strike," November, pages 80–82.

Svedberg, Gunnar, et al.

"A Future for Biomass," October, pages 94–96.

Turley, W. Dale, et al.
"Taking an Engine's Temperature," January, pages 72–74.

Tweedt, Daniel L., et al.
"Using Stream Surfaces for Blade Design," April, pages 66–68.

Valenti, Michael
"Cleaning Up After High-Sulfur Coal," February, pages 66–70.
"Designing a Leaner, Cleaner Machine," May, pages 84–86.
"Determining Gas-Meter Accuracy," March, pages 102–106.
"The Fantastical Meets the Practical," December, pages 66–71.
"Hydraulics Take Center Stage," April, pages 52–57.
"Lighting the Way to Improved Disinfection," July, pages 82–86.
"Making Merry on the Midway," May, pages 64–69.
"Metal Seals for the Final Frontier," November, pages 72–74.
"Molten-Carbonate Fuel Cells Go Navy," December, pages 78–79.
"New Gas-Turbine Designs Push the Envelope," August, pages 58–61.
"Power Companies Electrify the Coating Industry," June, pages 64–68.
"Re-engineering for Remediation," July, pages 92–94.
"Refurbishing Steam Turbines," December, pages 84–86.
"Upgrading Aging Hydraulics," January, pages 54–58.

van den Hout, Franklin, and Jo Koullen
"A Tiny Turbojet for Model Aircraft," August, pages 66–69.

Wen, Guoping, et al.
"Compacting Coal into Logs," November, pages 84–86.

Wiitala, Jared M., et al.
"A More Flexible Robotic Wrist," July, pages 78–80.

Xue, Kang, et al.
"Compacting Coal into Logs," November, pages 84–86.

Yan, Jinyue, et al.
"A Future for Biomass," October, pages 94–96.

Mechanical Engineering Power Articles by Author*

Cleveland, A. B.
"Who Owns the Objects?," November, Software Exchange, page 4.

Collins, Steven, et al.
"The Fate of R&D in the Competitive Era," November, pages 14–16.

Deitz, Dan
"Simulations Keep Oil Plants Clean," November, pages 9–10.

Herman, David
"Power-Plant Innovation is a Global Goal," November, News & Notes, page 2.

O'Leary, Jay
"A New Reactor for the New Europe," November, pages 11–13.

Pai, David H.
"Coal and the Environment in China," November, pages 17–18.

Stevens, Becky
"Developing Virtual Power Plants," November, pages 31–34.

Torpey, Paul J., et al.
"The Fate of R&D in the Competitive Era," November, pages 14–16.

Torrero, Edward A., et al.
"The Fate of R&D in the Competitive Era," November, pages 14–16.

Valenti, Michael
"Compensating for Lightning," November, pages 25–27.
"Fabric Printing Just Got Better," November, pages 29–30.
"Farming the Heartland Wind," November, News & Notes, page 2.
"The High Price of Nuclear Phaseout," November, pages 6–8.
"Keeping Milk Cool in Hawaii," November, pages 19–20.
"Serving Utilities and Their Customers," November, pages 21–23.
